Education

Bachelor of Engineering in Computer Science and Engineering (B.E. CSE)

2023 – 2027

Chennai Institute of Technology and Applied Research, Chennai

CGPA: 9.05 / 10

Professional Summary

- CSE undergraduate specializing in **Machine Learning**, **Data Science**, and **Full-Stack Development**
- Experienced in building and deploying end-to-end **ML pipelines**, including data preprocessing, model development, evaluation, and **API-based deployment** using **FastAPI**, **Flask**, and **Docker**.
- Proven problem-solving ability through **competitive programming**, internships, and **national-level hackathon finals**, with a strong focus on clean code, performance optimization, and scalability.
- Quick learner with strong **teamwork**, communication, and analytical skills.

Technical Skills

- **Programming Languages:** Python, C, Java, JavaScript, SQL
- **Web & Backend:** HTML, CSS, React.js, Node.js, Express.js, FastAPI, Flask, REST APIs
- **AI / ML & Data Science:** Scikit-learn, TensorFlow, Keras, NLP, Sentiment Analysis, Time-Series Forecasting, Supervised & Unsupervised Learning, Computer Vision, OpenCV
- **Data Science & Tools:** Pandas, NumPy, Matplotlib, Exploratory Data Analysis (EDA), Streamlit, Docker, Git, GitHub, VS Code, Jupyter Notebook.
- **Databases:** PostgreSQL, MongoDB, MySQL
- **Areas of Interest:** Artificial Intelligence, Machine Learning, Data Science, Quantum Computing

Work Experience

Machine Learning Intern — Saiket Systems (Remote)

Mar – Apr 2026

- Developed supervised ML models in **Python** using **Scikit-learn** and **TensorFlow** for real-world classification and regression problems, following an end-to-end workflow from data preprocessing to evaluation.
- Performed **exploratory data analysis (EDA)** and feature engineering on structured datasets to improve model performance and interpretability.
- Implemented and compared multiple algorithms (**logistic regression**, **tree-based models**, etc.), tuning hyperparameters and tracking metrics such as accuracy and F1-score.

Front-End Developer Intern — SSV's Traders (On-site)

May 2024

- Developed and deployed responsive UI components using HTML, CSS, and JavaScript, improving cross-device compatibility by **30%**.
- Integrated frontend modules with live backend REST APIs, reducing data fetch latency by **20%** through optimized API calls.
- Collaborated with a 4-member Agile team to deliver sprint features ahead of deadlines while maintaining code quality and usability.

Data Science Intern | Cognifyz Technologies (Remote)

Mar – Apr 2026

- Gained Experience on applying ML and data analysis techniques to real-world tasks with strong attention to detail.
- Demonstrated effective communication, exceptional coordination, and consistent enthusiasm in acquiring hands-on data science and model development skills.

Projects

FloSync – AI Flood Resilience Platform Python, LSTM, FastAPI, React, Docker

Sept 2025

- Integrated OpenWeatherMap and IMD APIs to fetch real-time rainfall and river-level data every **15 minutes** for continuous monitoring.
- Built and deployed an LSTM-based time-series forecasting model achieving **92% accuracy** for 3-day flood risk prediction, with SMS alerts triggered within **30 seconds**.

MarkTrade – Real-Time AI Stock Insight Platform Python, FinBERT, NLP, Streamlit

Aug 2025

- Implemented FinBERT-based sentiment analysis on **10,000+ news headlines**, generating buy/hold/sell signals with **78% backtested accuracy**.
- Combined RSI and Moving Average indicators with AI insights, reducing false trading signals by **25%** and deployed a real-time Streamlit dashboard with **3-second latency**.

AI Learning Assistant for Rural Education Python, Hugging Face, TensorFlow Lite

Jul 2025

- Built a bilingual (English/Tamil) adaptive AI tutor using Hugging Face transformers; the real-time quiz engine improved learner engagement by **40%**.
- Optimized models with TensorFlow Lite for low-RAM (< 2 GB) devices and implemented an offline-first architecture using service workers for rural school environments.

AI-Powered Lost & Found System Python, OpenCV, ResNet50, MongoDB

Sep 2025

- Built a Siamese Neural Network with ResNet50 embeddings; processed **5,000+ images** and achieved **85%** top-5 matching accuracy.
- Reduced manual verification effort by **70%** using confidence-based filtering and an automated email alert system.

Competitive Programming

- **LeetCode** – Rating: 1490 Problems Solved: 450+
- **CodeChef** – Rating: 1158 Problems Solved: 200+
- **Codeforces** – Rating: 1022 Problems Solved: 50+

Achievements & Activities

- **TCS CodeVita Season 12** – Achieved Global Rank **6599** in Round 2 among **200,000+** participants worldwide.
- **National Hackathon Finalist** – Shortlisted among top teams at **HackOrbit** and the **NIT Trichy FinTech Hackathon**.
- **NPTEL Elite Certification** – Ethical Hacking by IIT Kharagpur with a **73%** score.
- Secured **1st place** in the **ML Ware Hackathon Championship** conducted by **IIT Varanasi** on Kaggle.

Certifications & Coursework

- **AWS:** Certified Cloud Practitioner — Generative AI Foundations — Machine Learning Foundations
- **IBM:** AI Essentials — Web Development Essentials
- **Cisco:** Intro to Networks — Cybersecurity Essentials — Data Analytics Essentials
- **NPTEL (IIT Kharagpur):** Ethical Hacking – Elite Certification
- **Coursera:** Data Structures & Algorithms — Python for Data Science — Google Cybersecurity — Data Visualization in Excel
